

Donald Byrne, CBCP, CDCP, Lead Auditor: Mr. Byrne is a Certified Business Continuity Professional (CBCP), Lead Auditor, and Certified Data Center Professional (CDCP) who is active in all aspects of emergency management, business continuity planning, and operational resiliency. A veteran, Don's experience in dealing with emergency situations goes back to his military training in hazmat response at the US Army Chemical and Biological Warfare school. He is the ACP representative to the ANSI National Accreditation Board's *Committee of Experts* (ANAB-COE) which is working with DHS on the PS-Prep program. Don is actively involved with developing international standards and is a member of several committees that are working on business continuity standards for adoption by ISO. Mr. Byrne holds degrees in mathematics and philosophy, and has a Masters in Business Administration. He is part of the adjunct faculty at several colleges including Boston University's Graduate School of Business where he designed and teaches courses on continuity planning, security management, and risk assessment. He has lectured on these topics around the world and reports on them for ContinuityCompliance.org, a news website. He is the founder of the consulting firm North River Solutions and is president and CEO of Metrix411, a company specializing in online assessments tools and business benchmarking.
